Summary of Industry

In 2020, the global information technology industry took a small step back in terms of overall revenue. As of August 2020, the research consultancy IDC was projecting global revenue of \$4.8 trillion for the year, compared to their original estimate of \$5.2 trillion. While the tech sector fared better than many other industries during the pandemic, it was not immune to cutbacks in spending patterns and deferment of major investments. Moving forward, IDC projects that the technology industry is on pace to reach \$5 trillion in 2021. If this number holds, it would represent 4.2% growth, signaling a return to the trend line that the industry was on prior to the pandemic. Looking even further into the future, IDC expects the pattern to continue, estimating a 5% compound annual growth rate (CAGR) for the industry through 2024.

INTERNAL RISK FACTORS

1. Uncertainty in relation to continuing effect of the COVID-19 pandemic on our business and operations;

In late calendar 2019, COVID-19, commonly known as “novel coronavirus” was first reported in Wuhan, China. Since then, the virus has progressively spread globally to many countries. The World Health Organization declared the COVID-19 outbreak as a health emergency of international concern on January 30, 2020 and thereafter categorized the outbreak as a pandemic on March 11, 2020.

In order to contain the spread of COVID-19 virus, the Government of India initially announced a 21-days lockdown on March 24, 2020, which, after being subject to successive extensions, is being relaxed currently. During the duration of the lockdown, there were several restrictions in place including travel restrictions and directive to all citizens to not move out of their respective houses unless essential. However, during the initial stages of the lockdown our business operations were temporarily disrupted and we faced limited availability of drivers and customers.

Due to the rising number of infected cases of COVID-19 in the country, there is no certainty if additional restrictions will be put back in place or if another lockdown would be re-imposed to control the spread of the pandemic. We cannot assure you that we may not face any difficulty in our operations due to such restrictions and such prolonged instances of lockdown may adversely affect our business, financial condition and results of operations. Further, our ability to ensure the safety of our workforce and continuity of operations while confirming with measures implemented by the central and state governments in relation to the health and safety of our employees may result in increased costs. In the event a member or members of our senior management team contract COVID-19, it may potentially affect our

operations. Further, in the event any of our employees contract COVID-19, we may be required to quarantine our employees and shut down a part of or the entire our offices, as necessary. Risks arising on account of COVID-19 can also threaten the safe operation of our facility, offices, loss of life, injuries and impact the well-being of our employees. The ultimate impact will depend on a number of factors, many of which are outside our control. These factors include the duration, severity and scope of the pandemic, the impact of the pandemic on economic activity in India and globally, the eventual level of infections in India or in the regions in which we operate, and the impact of any actions taken by governmental bodies or health organizations (whether mandatory or advisory) to combat the spread of the virus. These risks could have an adverse effect on our business, results of operations, cash flows and financial condition. As on the date of this Prospectus, while we have started our operations post lockdown, there is significant uncertainty on the impact of COVID-19 on global and Indian economy and we may not be able to accurately predict its near term or long term impact on our business.

- 2. We face significant competition in our business from Indian and international companies, and we may be unsuccessful in competing against current and future competitors, which could have an adverse impact on the pricing of our services as well as increase the costs associated with growing our customer base.***

The Software Consultancy industry in India is highly competitive, and we expect that the competition in this industry will continue to increase. Our Industry is fragmented consisting of large established players and niche players. We compete with organized as well as unorganized sector on the basis of availability of consumers. Thus, our customers have the option of choosing any competitor providing similar services. Further, there are no entry barriers in this industry and any expansion in capacity of existing competitors would further intensify competition. If we are not able to compete effectively with existing or future competitors, our business and financial condition could be adversely affected.

Many of our competitors have good operating histories and significantly greater financial resources than we do. The management of some of these competitors may have more experience in implementing their business plan and strategy and may be more successful in increasing the number of customers, as well as increasing the revenues generated. We expect that our costs related to marketing and human resources will increase as our competitors undertake marketing campaigns to enhance their brand name and increase the volume of business conducted through their services. We expect many of our competitors to expend financial and other resources to improve their network and system infrastructure to compete more aggressively. Our inability to adequately address these and other competitive pressures will likely have a negative impact on the level of fees we can charge for our services as well as increase the costs associated with growing our customer base, which is likely to have a material adverse effect on our business, prospects, financial condition and results of operations.

- 3. We continue to explore the diversification of our business and the implementation of new models and services. These diversifications and our other strategic initiatives may not be successful, which may adversely affect our business and results of operations.***

In order to achieve our goal, we are constantly evaluating the possibilities of expanding our business through new models, innovations and/or starting new services. Our key strategic initiatives, which include our diversification plans, are:

- Maintain continued emphasis on innovation and customization of our services;
- Pursue enhancement and diversification of our advertising revenue streams;
- Strengthen our brand recall;

Although we believe that there are synergies between our current business and our expansion plans, we do not have any experience or expertise in these new areas. These new businesses and modes of delivery and the implementation of our strategic initiatives may pose significant challenges to our administrative, financial and operational resources, and additional risks, including some of which we are not aware of. The early stages and evolving nature of some of our businesses also make it difficult to predict competition and consumer demand therein. Our strategic initiatives require capital and other resources, as well as management attention, which could place a burden on our resources and abilities. In addition, we cannot assure you that we will be successful in implementing any or all of our key strategic initiatives. If we are unable to successfully implement some or all of our key strategic initiatives in an effective and timely manner, or at all, our ability to maintain and improve our leading market position may be negatively impacted, which may have an adverse effect on our business and prospects, competitiveness, market position, brand name, financial condition and results of operations. Please refer chapter titled “*Our Business*” beginning on Page No. 78 of this Prospectus.

- 4. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.***

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

5. *Any slowdown in the Software Consultancy and its ancillary industries can impact our business, results of operations, financial condition and cash flows.*

The services provided by our Company is majorly used by companies engaged in variety of industry. Thus, the performance of our Company is heavily dependent on the purchase power of businesses. For details of our Industry and services provided by us, please refer to the chapter titled “Our Industry” and “Our Business” beginning on Page No. 70 and 78 respectively of this Prospectus. Any economic slowdown, both globally and in industries, in which we operate, may significantly affect our revenues and our growth prospects.

6. *We have a limited operating history and may be subject to risks inherent in early stage companies, which may make it difficult for you to evaluate our business and prospects.*

Although we were incorporated in 2017, we have a limited operating history upon which you can evaluate our business and prospects. In Fiscal 2021, we booked revenues ₹ 271.33/- lacs and PAT of ₹ 46.93/- lacs. You must consider our business and prospects in light of the risks and difficulties we face as an early stage Company with a limited operating history and should not rely on our past results as an indication of our future performance. In particular, our management may have less experience in implementing our business plan and strategy compared to our more well-established competitors, including our strategy to increase our market share and build our brand name. In addition, we may face challenges in planning and forecasting accurately as a result of our limited historical data and inexperience in implementing and evaluating our business strategies. Our inability to successfully address these risks, difficulties and challenges as a result of our inexperience and limited operating history may have a negative impact on our ability to implement our strategic initiatives, which may have an adverse effect on our business, prospects, financial condition and results of operations.

7. *Our top 5 customers contribute majority of our revenues from operations. Any loss of business from one or more of them may adversely affect our revenues and profitability.*

Our top 5 customers contributed 94.48% of our revenues for the Fiscal 2021, based on restated financial statements. Further, our top 5 customers contributed 98.24% of our revenues for the year ended March 31, 2020 based on restated financial statements. However, our top customers may vary from period to period depending on the demand and thus the composition and revenue generated from these clients might change as we continue to add new customers in normal course of business. Since our business is concentrated among relatively few significant customers, we could experience a reduction in our results of operations, cash flows and liquidity if we lose one or more of these customers or the amount of business we obtain from them is reduced for any reason, including but not limited on account of any dispute or disqualification.

Accordingly, we cannot assure you that the customers which contribute to the major part of our revenue stream will pay us the amounts due to us on time, or at all. In the event any of our significant customers fail to fulfil their respective obligations, our business, financial condition and results of operations would be adversely affected. While we believe we have maintained good and long term relationships with our customers. However, there can be no assurance that we will continue to have such long term relationship with them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

8. *We require a number of registrations in the ordinary course of our business. Some of the registrations are required to be transferred in the name of ‘Naapbooks Limited’ from ‘Naapbooks Private Limited’ pursuant to name change of our company and any failure or delay in obtaining the same in a timely manner may adversely affect our operations.*

Pursuant to our conversion from a private limited company to a public limited company in the year 2020, we need to take necessary steps for transferring the registrations of our company in the new name. For more information, see chapter “Government and Other Statutory Approvals” on page 131 of this Prospectus.

9. *There have been some instances of non-filing/delays /incorrect filings in the past with certain statutory authorities. If the authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.*

In the past, there have been some instances of non-filings or incorrect filings or delays in filing statutory forms with the RoC, which have subsequently been filed along with the payment of additional fees, as specified by RoC. Except as mentioned in this Prospectus, till date, there has been no penalty levied on the Company for such delays/default. However, it cannot be assured that even in future no such penalty will be levied. Therefore, if the authorities impose monetary penalties on us or take certain punitive actions against our Company or its Directors/Officers in relation to the same, our business, financial condition and results of operations could be adversely affected.

10. Brand recognition is important to the success of our business, and our inability to build and maintain our brand names will harm our business, financial condition and results of operation.

Brand recognition is important to the success of our business. Establishing and maintaining our brand names in the Software Consultancy industry or for people relying on services is critical to the success of the customer acquisition process of our business. Although, we expect to allocate significant amount of resources, financial and otherwise, on establishing and maintaining our brands, no assurance can be given that our brand names will be effective in attracting and growing user and client base for our businesses or that such efforts will be cost-effective, which may negatively affect our business, financial condition and results of operations.

11. We depend on certain brand names and our corporate name and logo that we may not be able to protect and/or maintain.

Our ability to market and sell our products depends upon the recognition of our brand names and associated consumer goodwill. We have not yet applied trademark registration for some of our Products. Consequently, we do not get to enjoy the benefit of statutory protections accorded to registered trademarks in India for our Company. There is no guarantee that the application for registration of logo will be accepted in favour of the Company. This may affect our ability to protect our trademark in the event of any infringement of our intellectual property. In the absence of such registrations, competitors and other companies may challenge the validity or scope of our intellectual property right over these brands or our corporate name or logo. As a result, we may be required to invest significant resources in developing new brands or names, which could materially and adversely affect our business, financial condition, results of operations and prospects. In addition to same, our failure to comply with existing or increased regulations, or the introduction of changes to existing regulations, could adversely affect our business, financial condition, results of operations and prospects.

12. Our success depends upon our Directors and the Key Managerial Personnel. Disassociation of our Directors or any failure to retain such key managerial personnel could have an adverse impact on our business, financial conditions and results of operations.

Our success depends heavily on retaining the services of our directors and key management personnel. If any one or more of such personnel cease to work with us and we are unable to find suitable replacement personnel in a timely and cost efficient manner, our business may be disrupted and we may not be able to achieve our business objectives, including our ability to manage our rapid growth and successfully implement our strategic initiatives. In addition, we will need to hire more employees as we continue to implement our key strategy of building on our leading market position and expanding our business. Competition for qualified personnel in the areas in which we compete remains intense and the pool of qualified candidates is limited. Our inability to attract, hire and retain qualified staff on a cost efficient basis may have a material adverse effect on our business, prospects, financial condition, results of operations and ability to successfully implement our growth strategies.

13. Our Promoter and Promoter Group will continue to retain majority control over the Company after the Issue, which will allow them to influence the outcome of matters submitted to shareholders for approval.

Upon completion of the Issue, our Promoter and Promoter Group will own 63.10% of the Post-Offer Equity Share capital of the Company. As a result, the Promoter and Promoter Group will have the ability to exercise significant influence over all matters requiring shareholders' approval, including the election of directors and approval of significant corporate transactions. The Promoter and Promoter Group will also have an effective veto power with respect to any shareholder action or approval requiring a majority vote. Such concentration of ownership may also have the effect of delaying, preventing or deterring a change in control. For further details of Promoter' shareholding, please refer chapter titled "Capital Structure" beginning on Page No. 49 of this Prospectus.

14. Conflicts of interest may arise out of common business undertaken by Promoter Group entity.

Our Promoter Group Entity is carrying out similar activities as those conducted by our Company. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company, promoter group entity in circumstances where our respective interests diverge. In cases of conflict, our Promoter may favour other company in which our Promoter has interests. There can be no assurance that our Promoter or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will

not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition.

15. *Our Promoter and Directors have interests in the Company which may result in a conflict of interest, which may have an adverse effect on our business.*

Our Promoter hold Equity Shares in our Company and are also part of key management of the Company and may be deemed to be interested to the extent of any remuneration, fees and dividend payable to them and other distributions in respect of the Equity Shares. For further details, please refer chapters titled “*Our Management*” and “*Financial Statements – Related Party Transactions*” beginning on Page No. 96 and 113 respectively of this Prospectus.

16. *Our promoters have limited experience in the industry in which our company is operating.*

Our Promoters are young and are associated with the company since 2017. Prior to this, they did have limited business exposure in the industry in which our Company is operating. Although they have been successfully running the business operations, lack of vintage experience to address the risks frequently encountered by industry, may adversely affect our operations.

17. *Our financing requirements and the deployment of the net proceeds of the Issue are based on management estimates and have not been independently appraised.*

Our financing requirements and the deployment of the net proceeds of the Issue are based on management estimates and have not been appraised by any bank or financial institution. In view of the highly competitive nature of the industry in which we operate, we may have to revise our management estimates from time to time and consequently our financing requirements and the expected deployment of the net proceeds of the Issue may also change.

18. *Our revenues and profits are difficult to predict and can vary significantly from year on year, which may impact our ability to pay dividend and which could cause the price of our Equity Shares to fluctuate.*

Our revenues are dependent on several factors such as, ability to attract fresh talent in the industry and general market conditions. For further details please refer chapter titled “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” beginning on Page No. 116 of this Prospectus. The combination of these factors may result in significant variations in revenues and profits and as a result of the same year on year results may not be comparable and should not be relied upon as indicative of future performance. Any significant shortfall in revenue may have an adverse effect on our business, operating results and financial condition.

19. *Our Company does not own the registered office. Any dispute in relation to the lease of our premises would have a material adverse effect on our business and results of operations.*

Our Company operates from rented and leased premises. If any of the owners of these premises do not renew the agreements under which we occupy the premises or renew such agreements on terms and conditions that are unfavorable to our Company, it may suffer a disruption in our operations or have to pay increased rentals which could have a material adverse effect on our business, financial condition and results of operations. Any dispute in relation to the lease of our premises would have a material adverse effect on our business and results of operations. For more information, please refer chapter titled “*Our Business*” on Page No. 78 of this Prospectus.

20. *Our Company is dependent on third party service providers for provision of service and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.*

Our Company uses third party equipment to render the output from the software. We significantly depend upon such service for providing the desired results to our clients. Decrease in quality of our service provider may affect our Company’s reputation and results of operations. Though our business has not experienced any disruptions in the past, any future event may have an adverse effect on our business.

21. *We will require additional capital to support the growth of our business, and this capital might not be available on reasonable terms or at all.*

To continue to effectively compete, we will require additional funds to support the growth of our business and allow us to invest in new products, offerings, and markets. If we raise additional funds through further issuances of equity or convertible debt securities, our existing stockholders may suffer significant dilution, and any new equity securities we issue may have rights, preferences, and privileges superior to those of existing stockholders. Certain of our existing debt instruments contain, and any debt financing we secure in the future could contain, restrictive covenants relating to our ability to incur additional indebtedness and other financial and operational matters that make it more difficult for us to obtain additional capital with which to pursue business opportunities. For example, our existing debt instruments contain significant restrictions on our ability to incur additional secured indebtedness. We may not be able to obtain additional financing on favorable terms, if at all. If we are unable to obtain adequate financing or financing

on terms satisfactory to us when required, our ability to continue to support our business growth and to respond to business challenges and competition may be significantly limited.

22. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the Issue price.*

Our Promoter average cost of acquisition of Equity Shares in our Company could be lower than the Issue Price as decided by the Company in consultation with the Book Running Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoter in our Company and build-up of Equity Shares by our Promoter in our Company, please refer chapter title “*Capital Structure*” and “*Summary of Offer Document*” beginning on page 49 and 19, respectively of this Prospectus.

23. *Our Company may be affected by changes in technology that relate to our business.*

Our Company operates in the software consultancy industry based on technology which is constantly changing and is significantly governed and affected by scientific breakthroughs, developments, innovation, government policy and laws pertaining to information technology as well as intellectual property. These factors can affect the demand, pricing and value of our services which have already been developed and which are in the course of being developed. Our continued growth will depend upon our ability to sustain cutting edge technology solutions, adapt to the updated / superior / modified technology which we may be required to use with time and to train our executives in order to utilize the technology and the talents of our human resource to their maximum potential. In the event that we fail to adapt and match pace with the growth in technology and adoption of the same through sufficient training of our executives, the same may adversely affect our business, prospects, the results of operations and financial condition.

24. *Our revenues and profits are dependent on several factors. Any adverse change in these factors or in combination of these factors may affect our business operations and the financial condition and consequently, our ability to pay dividends.*

Our revenues and profits are dependent on several factors such as retaining our key managerial personnel, our compliance with laws, managing costs and expenses, maintaining adequate inventory levels and general market conditions. Any adverse change in these factors or a combination of these factors may adversely affect our business operations and the financial condition. Further, our ability to pay dividends will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditures, lender’s approvals and other factors. Therefore, there can be no assurance that we shall have distributable funds or that we will declare dividends.

25. *Delays or defaults in payments from our clients could result into a constraint on our cash flows.*

The efficiency and growth of our business depends on timely payments received from our clients. In the event, our clients default or delay in making payments and clearing their dues, we may not have adequate resources to fund our business and implement our growth plans. This could have an adverse effect on the results of operations and our financial condition.

26. *The shortage or non-availability of power facilities may adversely affect our business processes and have an adverse impact on our results of operations and financial condition.*

We are mainly dependent on local electricity service provider for meeting our electricity requirements, there may be factors beyond our control affecting the supply of power. Any power failure may lead to increased costs, thereby affecting the profitability.

27. *Our Company’s future success depends upon our ability to effectively implement our business and growth strategies, failing which, our growth and business may be adversely affected.*

Our Company’s success will depend substantially on our ability to effectively implement our business and growth strategies. Our Company may not be able to execute our strategies in a timely manner or within our budget estimates or be able to meet the expectations of our consumers and other stakeholders. We believe that our Company’s business and growth strategies will place significant demands on our senior management and other resources and will require us to develop and improve operational, financial and other internal controls. Any inability to manage our business and growth strategies may adversely affect our Company’s business, prospects, the results of operations and financial condition.

28. *Any future acquisitions, joint ventures, partnerships, strategic alliances, tie-ups or investments could fail to achieve expected synergies and may disrupt our business and harm the results of operations and our financial condition.*

Our success will depend, in part, on our ability to expand our business in response to changing technologies, customer demands and competitive pressures. We have, in the past, explored and continue to explore opportunities on our own, through collaborations, tie-ups, strategic alliances, partnerships or joint venture across the country and regions of focus. In some circumstances, we may also decide to acquire, or invest in, complementary technologies instead of internal

development. While we are currently evaluating opportunities and negotiating with several potential partners, we have not entered into any definitive agreements. The risks we face in connection with acquisitions may include integration of product and service offerings, co-ordination of R&D and marketing functions and the diversion of management's time and focus from operating our business to addressing challenges pertaining to acquisition and integration. Our failure to address these risks or other problems encountered in connection with our acquisitions and investments could result in our failure to realize the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

29. *Our ability to pay dividend in the future will depend upon future earnings, financial conditions, cash flows, working capital and capital expenditure requirements.*

Our Company has not declared and paid dividend in the past. Our Company cannot give any assurance that dividend will be paid in future. The declaration and payment of any dividend in the future will be recommended by our Board of Directors, at their discretion, and will depend on a number of factors like our earnings, cash generated from operations, capital requirements and overall financial condition of our Company.

30. *We have and may in the future enter into related party transactions.*

We have in the course of our business entered into, and will continue to enter into, transactions with related parties. Our Company has entered into several related party transactions with our related parties. For more information regarding our related party transactions, please refer chapter titled "*Financial Statements – Related Party Transactions*" beginning on Page No. 113 of this Prospectus. We cannot assure you that we will receive similar terms in our related party transactions in the future. While we believe that all of our related party transactions are in compliance with applicable law, we cannot assure you that we could not have achieved more favorable terms had such transactions been entered into with unrelated parties. Further, the Companies Act, 2013 has brought into effect significant changes to the Indian Company law framework including specific compliance requirements such as obtaining prior approval from audit committee, board of directors and shareholders for certain related party transactions. We cannot assure you that such transactions, individually or in the aggregate, will not have an adverse effect on our reputation, cash flows, business, results of operations and financial condition.

31. *We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.*

The proposed fund requirement as detailed in the chapter titled "*Objects of the Issue*" is to be funded from the proceeds of the Initial Public Offering. However, we have not identified any alternate source of funding to meet our funding requirements either through our owned funds, internal accruals or debt and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule, and we may have to obtain additional borrowings. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For further details, please refer the chapter titled to the chapter titled "*Objects of the Issue*" beginning on Page No. 60 of this Prospectus.

32. *There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.*

As per SEBI (ICDR) Regulations, appointment of monitoring agency is required only for Issue size above Rs.100 crores. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

33. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed fund requirement, for funding purchase of equipment, marketing initiatives, primarily, as detailed in the section titled "*Objects of the Issue*" is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We, therefore, cannot assure that we would be able to execute our future plans/strategy within the estimated time frame.

34. *Our workplace culture and forward-leaning approach created operational, compliance and cultural challenges and a failure to address these challenges would adversely impact our business, financial condition, operating results and prospects.*

Our workplace culture and forward-leaning approach created significant operational and cultural challenges that have in the past harmed and may in the future continue to harm our business results and financial condition. Our focus on aggressive growth and intense competition, and our prior failure to prioritize compliance has led to increased

regulatory scrutiny. Recent changes in our Company's cultural norms and composition of our leadership team together with our ongoing commitment to address and resolve our historical cultural and compliance problems and promote transparency and collaboration may not be successful and regulators may continue to perceive us negatively, which would adversely impact our business, financial condition, operating results and prospects.

35. *Our business depends on retaining and attracting high-quality personnel, and continued attrition, future attrition, or unsuccessful succession planning could adversely affect our business.*

Our success depends in large part on our ability to attract and retain high-quality management, operations, engineering and other personnel who are in high demand are often subject to competing employment offers and are attractive recruiting targets for our competitors. Challenges related to our culture and workplace practices and negative publicity we experience have in the past led to significant attrition and made it more difficult to attract high-quality employees. Future challenges related to our culture and workplace practices or additional negative publicity could lead to further attrition and difficulty attracting high-quality employees. Future leadership transitions and management changes may cause uncertainty or a disruption to our business and may increase the likelihood of senior management or other employee turnover. The loss of qualified executives and employees or an inability to attract, retain and motivate high-quality executives and employees required for the planned expansion of our business, may harm our operating results and impair our ability to grow.

36. *If we fail to maintain an effective system of internal controls, we may not be able to successfully manage or accurately report our financial risks.*

Effective internal controls are necessary for us to prepare reliable financial reports and effectively avoid fraud. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may deteriorate over time, due to evolving business conditions. There can be no assurance that additional deficiencies in our internal controls will not arise in the future, or that we will be able to implement and continue to maintain adequate measures to rectify or mitigate any such deficiencies in our internal controls.

37. *Industry information included in this Prospectus has been derived from industry reports and unsolicited digital media articles. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Prospectus.

RISK RELATING TO OBJECTS OF THE ISSUE

38. *The requirement of funds in relation to the objects of the Issue has not been appraised includes utilization for general corporate purposes and is based on management estimates. We may have to revise our management estimates from time to time and which may affect our funding requirements.*

We intend to use the net proceeds of the Issue for the funding purchase of equipment, marketing initiatives, primarily. The objects of the Issue have not been appraised by any bank or financial institution. These estimates are based on current conditions and requirements and are subject to changes in external circumstances or costs, or in other financial conditions, business or strategy, as discussed further below and are based on management estimates and planning. Based on the competitive nature of the industry, we may have to revise our management estimates and upgrade from time to time and consequently our funding requirements may also change. For details please refer the section titled "Objects of the Issue" beginning on Page No. 60 of this Prospectus

39. *The deployment of funds to be raised from the present Issue of shares is at our discretion and no independent agency has been appointed to monitor its deployment.*

the deployment of funds towards the object of the Issue will be monitored by our audit committee and our Company shall inform about material deviations in the utilization of Issue proceeds, if any, to the stock exchange and provide the details in the balance sheet about the same.

RISK RELATING TO EQUITY SHARES

41. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

42. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the BSE Startups Platform of BSE Limited (BSE) in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the BSE Startups Platform of BSE Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

43. *Any future issuance of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoter or other shareholders may adversely affect the trading price of the Equity Shares.*

Any future equity issuances by us, including in a primary offering, may lead to the dilution of investors’ shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

44. *There is no existing market for our Equity Shares and we cannot assure you that such a market will develop. The stock price may be volatile, and you may be unable to resell your shares at or above the Issue price or at all.*

Prior to this Offer, there has been no public market for our Equity Shares and an active trading market may not develop or be sustained upon the completion of this Offer. The Issue Price of the Equity Shares offered hereby may not be indicative of the market price of the Equity Shares after this Offer. The market price of our Equity Shares after this Issue will be subject to significant fluctuations in response to among other factors:

1. Any failure to comply with the financial and restrictive covenants under our financing arrangements;
2. Our ability to retain and hire key employees or maintain good relations with our workforce;
3. Impact of any reduction in revenue from our services or defects in our services;
4. Realization of Contingent Liabilities, if any;
5. Any disruption in software consultancy industry or strikes by our employees/drivers may affect our service capability;
6. Increased competition in industries/sector in which we operate;

7. General economic and business conditions in India and in the markets in which we operate and in the local, regional and national economies;
8. Changes in laws and regulations relating to the Sectors in which we operate;
9. Political instability or changes in the Government in India or in the government of the states where we operate could cause us significant adverse effects;
10. Any adverse outcome in the legal proceedings in which we are/get involved;
11. Failure to obtain any applicable approvals, licenses, trademarks, registrations and permits in a timely manner;
12. Occurrence of natural or man-made disasters could adversely affect our results of operations and financial condition and
13. Our inability to successfully diversify and timely market our service offerings may adversely affect our growth and negatively impact our profitability.

Even though a Market Maker has been appointed for our stock, since there has been no public market for our Company's Equity Shares, an active trading market on the Indian Stock Exchanges may not develop or be sustained after the Offer. The Issue price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Offer. The market price of the Equity Shares after the Issue may be subject to significant fluctuations in response to, among other factors, variations in our Company's operating results, market conditions specific to the packaging sector in India, developments relating to India and volatility in the Stock Exchanges and securities markets elsewhere in the world.

45. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares has been determined by the management and the Book Running Lead Manager on numerous factors and may not be indicative of the market price of our Equity Shares after the Offer. For further information please refer the chapter titled "*Basis for Issue Price*" beginning on Page No. 66 of this Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Amongst the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Changes in economic, legal and regulatory factors (both domestic and international) unrelated to our performance such as global recession, imposition of trade / non-trade barriers and sanctions etc.

46. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under the Income-tax Act, 1961, capital gains arising from the sale of equity shares in an Indian Company are generally taxable in India except any gain realized on the sale of shares on a Stock Exchange held for more than 12 months will not be subject to capital gains tax in India if the Securities Transaction Tax ("STT") has been paid on the transaction. The STT will be levied on and collected by an Indian Stock Exchange on which equity shares are sold. Any gain realized on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a recognized Stock Exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of shares on a Stock Exchange held for a period of 12 months or less will be subject to short term capital gains tax. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

In Finance Bill 2017, Section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October, 2004 shall be available only if the acquisition of share is chargeable to STT under Chapter VII of the Finance (No 2) Act, 2004. In this case, this provision becomes effective, sale shares acquired on or after 1st day of October, 2004 on which STT was not charged will attract tax under provisions of Long Term Capital Gains.

As per Finance Bill 2018, exemption under section 10(38) for income arising from long term gains on transfer of equity share shall not be available on or after 1st day of April, 2018 if the long term capital gains exceeds ₹1,00,000/- p.a. Such income arising from long term gains on transfer of equity share on or after 1st day of April, 2018 in excess of ₹1,00,000/- p.a. shall be chargeable at the rate of 10%.

Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

47. *Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

48. *Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors assessments of Our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.*

Our financial statements, including the financial statements provided in this Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, refer chapter titled "*Certain Conventions, Presentation of Financial, Industry and Market Data*" beginning on Page No. 16 of this Prospectus. Accordingly, the degree to which the Indian GAAP financial statements included in this Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Prospectus should accordingly be limited.

India has decided to adopt the "Convergence of its existing standards with IFRS" and not the "International Financial Reporting Standards" ("IFRS"), which was announced by the MCA, through the press note dated January 22, 2010. These "IFRS based / synchronized Accounting Standards" are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed Company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards (i.e., IND (AS)) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

49. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business. Please refer to chapter titled "*Key Industry Regulations and Policies*" beginning on Page No. 87 of this Prospectus for details of the laws currently applicable to us. There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related

uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavorable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services such as central excise duty, service tax, central sales tax, state VAT and surcharge currently being collected by the central and state governments. The GST is expected to increase tax incidence and administrative compliance. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

Further, the general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18 onwards and the same may get triggered once transactions are undertaken to avoid tax. The consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences.

In the absence of any precedents on the subject, the application of these provisions is uncertain. The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

50. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

51. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

52. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

53. *The extent and reliability of Indian infrastructure could adversely affect our Company’s results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy; disrupt the transportation of goods and supplies, and costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

54. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

55. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

56. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

GLOBAL ECONOMIC OUTLOOK

One year into the COVID-19 pandemic, the accumulating human toll continues to raise concerns, even as growing vaccine coverage lifts sentiment. High uncertainty surrounds the global economic outlook, primarily related to the path of the pandemic. The contraction of activity in 2020 was unprecedented in living memory in its speed and synchronized nature. But it could have been a lot worse. Although difficult to pin down precisely, IMF staff estimates suggest that the contraction could have been three times as large if not for extraordinary policy support. Much remains to be done to beat back the pandemic and avoid divergence in income per capita across economies and persistent increases in inequality within countries.

Improved outlook: After an estimated contraction of –3.3 percent in 2020, the global economy is projected to grow at 6 percent in 2021, moderating to 4.4 percent in 2022. The contraction for 2020 is 1.1 percentage points smaller than projected in the October 2020 World Economic Outlook (WEO), reflecting the higher-than-expected growth outturns in the second half of the year for most regions after lockdowns were eased and as economies adapted to new ways of working. The projections for 2021 and 2022 are 0.8 percentage point and 0.2 percentage point stronger than in the October 2020 WEO, reflecting additional fiscal support in a few large economies and the anticipated vaccine-powered recovery in the second half of the year.

Global growth is expected to moderate to 3.3 percent over the medium term—reflecting projected damage to supply potential and forces that predate the pandemic, including aging-related slower labor force growth in advanced economies and some emerging market economies. Thanks to unprecedented policy response, the COVID-19 recession is likely to leave smaller scars than the 2008 global financial crisis. However, emerging market economies and low-income developing countries have been hit harder and are expected to suffer more significant medium-term losses.

Divergent impacts: Output losses have been particularly large for countries that rely on tourism and commodity exports and for those with limited policy space to respond. Many of these countries entered the crisis in a precarious fiscal situation and with less capacity to mount major health care policy responses or support livelihoods. The projected recovery follows a severe contraction that has had particularly adverse employment and earnings impacts on certain groups. Youth, women, workers with relatively lower educational attainment, and the informally employed have generally been hit hardest. Income inequality is likely to increase significantly because of the pandemic.

Close to 95 million more people are estimated to have fallen below the threshold of extreme poverty in 2020 compared with pre-pandemic projections. Moreover, learning losses have been more severe in low-income and developing countries, which have found it harder to cope with school closures, and especially for girls and students from low-income households. Unequal setbacks to schooling could further amplify income inequality.

High uncertainty surrounds the global outlook. Future developments will depend on the path of the health crisis, including whether the new COVID-19 strains prove susceptible to vaccines or they prolong the pandemic; the effectiveness of policy actions to limit persistent economic damage (scarring); the evolution of financial conditions and commodity prices; and the adjustment capacity of the economy. At the same time, it is unclear how much of these savings will be spent, given the deterioration of many firms’ and households’ balance sheets (particularly among those with a high propensity to consume out of income) and the expiration of loan repayment moratoria. In sum, risks are assessed as balanced in the short term, but tilted to the upside later on.

Considering the large uncertainty surrounding the outlook, policymakers should prioritize policies that would be prudent, regardless of the state of the world that prevails—for instance, strengthening social protection with wider eligibility for unemployment insurance to cover the self-employed and informally employed; ensuring adequate resources for health care, early childhood development programs, education, and vocational training; and investing in green infrastructure to hasten the transition to lower carbon dependence. Moreover, they should be prepared to flexibly adjust policy support, for example, by shifting from lifelines to reallocation as the pandemic evolves, and linked to improvements in activity, while they safeguard social spending and avoid locking in inefficient spending outlays. It is important to anchor short-term

support in credible medium-term frameworks (see the April 2021 Fiscal Monitor). Where elevated debt levels limit scope for action, effort should also be directed at creating space through increased revenue collection (fewer breaks, better coverage of registries, and switching to well-designed value-added taxes), greater tax progressivity, and by reducing wasteful subsidies.

Policy priorities: The factors shaping the appropriate stance of policy vary by country, especially progress toward normalization. Hence, countries will need to tailor their policy responses to the stage of the pandemic, strength of the recovery, and structural characteristics of the economy. Once vaccination becomes widespread and spare capacity in health care systems is generally restored to pre-COVID-19 levels, restrictions can begin to be lifted. While the pandemic continues, policies should first focus on escaping the crisis, prioritizing health care spending, providing well-targeted fiscal support, and maintaining accommodative monetary policy while monitoring financial stability risks.

As the recovery progresses, policymakers will need to limit long-term economic scarring with an eye toward boosting productive capacity (for example, public investment) and increasing incentives for an efficient allocation of productive resources. It is a delicate balance, especially given the prevailing uncertainty. Therefore, when support is eventually scaled back, it should be done in ways that avoid sudden cliffs (for instance, gradually reducing the government's share of wages covered under furlough and short-time work programs while increasing hiring subsidies to enable reallocation as needed).

All the while, long-term challenges—boosting productivity, improving policy frameworks, and addressing climate change—cannot be ignored. Differential recovery speeds across countries may give rise to divergent policy stances, particularly if advanced economies benefit sooner than others from wide vaccine coverage. Clear forward guidance and communication from advanced economy central banks is particularly crucial, and not just for calibrating the appropriate domestic monetary accommodation. It also vitally bears on external financial conditions in emerging markets and the impact that divergent policy stances have on capital flows.

Strong international cooperation is vital for achieving these objectives and ensuring that emerging market economies and low-income developing countries continue to narrow the gap between their living standards and those of high-income countries. On the health care front, this means ensuring adequate worldwide vaccine production and universal distribution at affordable prices—including through sufficient funding for the COVAX facility—so that all countries can quickly and decisively beat back the pandemic.

The international community also needs to work together to ensure that financially constrained economies have adequate access to international liquidity so that they can continue needed health care, other social, and infrastructure spending required for development and convergence to higher levels of income per capita. Countries should also work closely to redouble climate change mitigation efforts. Moreover, strong cooperation is needed to resolve economic issues underlying trade and technology tensions (as well as gaps in the rules-based multilateral trading system). Building on recent advances in international tax policy, efforts should continue to focus on limiting cross-border profit shifting, tax avoidance, and tax evasion.

(Source: World Economic Outlook Update, April 2021)

- Global activity is forecast to expand 4 percent in 2021, below previous expectations amid a sharp resurgence of new COVID-19 cases. Global growth is expected to strengthen over the forecast horizon as pandemic-related disruptions fade and as vaccination continues.
- In emerging market and developing economies (EMDEs), the recovery will be uneven, with a strong rebound in China and softer-than-expected growth across most other economies as the pandemic's lingering effects continue to weigh on consumption and investment.
- The recovery could be even weaker than envisioned if downside risks materialize, which could exacerbate the losses in per capita income and increase in poverty.
- Policy makers can raise the likelihood of better outcomes while warding off worse ones through effective pandemic control and structural reforms that boost both productivity and environmental sustainability.

INDIAN ECONOMIC OVERVIEW

India became the world's fifth largest economy last year, according to data from the IMF's October World Economic Outlook. When ranked by nominal GDP, the country leapfrogged France and the UK. The country's GDP growth has been among the highest in the world in the past decade – regularly achieving annual growth of between 6-7%.

(Source: <https://theprint.in/economy/india-is-now-the-worlds-5th-largest-economy-according-to-imf/369335/>)

India has emerged as the fastest growing major economy in the world and is expected to be one of the top three economic powers of the world over the next 10-15 years, backed by its strong democracy and partnerships.

India's nominal GDP growth rate is estimated at 12 per cent in 2019-20. The estimate for 2018-19 was 11.5 per cent. During Q1 of 2019-20, GDP (at constant 2011-12 prices) grew by 5 per cent. India has retained its position as the third largest startup base in the world with over 8,900-9,300 startups, with about 1,300 new start-ups being founded in 2019, according to a report by NASSCOM. India also witnessed the addition of 7 unicorns in 2019 till August, taking the total tally up to 24. India's labour force is expected to touch 160-170 million by 2020, based on rate of population growth, increased labour force participation, and higher education enrolment, among other factors, according to a study by ASSOCHAM and Thought Arbitrage Research Institute. India's foreign exchange reserves were US\$ 448.59 billion in the week up to November 22, 2019, according to data from the RBI.

India is expected to achieve the ambitious goal of doubling farm income by 2022. The agriculture sector in India is expected to generate better momentum in the next few years due to increased investments in agricultural infrastructure such as irrigation facilities, warehousing and cold storage. Furthermore, the growing use of genetically modified crops will likely improve the yield for Indian farmers. India is expected to be self-sufficient in pulses in the coming few years due to concerted efforts of scientists to get early-maturing varieties of pulses and the increase in minimum support price. The government of India targets to increase the average income of a farmer household at current prices to ₹Rs. 219,724 (US\$ 3,420.21) by 2022-23 from Rs 96,703 (US\$ 1,505.27) in 2015-16. Going forward, the adoption of food safety and quality assurance mechanisms such as Total Quality Management (TQM) including ISO 9000, ISO 22000, Hazard Analysis and Critical Control Points (HACCP), Good Manufacturing Practices (GMP) and Good Hygienic Practices (GHP) by the food processing industry will offer several benefits.

After growing at very high rates for years, India's economy had already begun to slow down before the onset of the COVID-19 pandemic. Between FY17 and FY20, growth decelerated from 8.3 percent to 4.0 percent, with weaknesses in the financial sector compounded by a decline in the growth of private consumption.

The implementation of a national lockdown on March 24, 2020 (i.e. on the eve of the new FY21 fiscal year), brought economic activity to a halt, affecting both production and consumption. As a result, growth was negative in the first half of the fiscal year (April to September 2020) and only modestly positive in the second half. Over the entire FY21, India's economy is estimated to have contracted by 8.5 percent.

In response to the COVID-19 shock, the Government and the Reserve Bank of India took several monetary and fiscal policy measures to support vulnerable firms and households, expand service delivery (with increased spending on health and social protection) and cushion the impact of the crisis on the economy. Thanks in part to these proactive measures, the economy is expected to rebound - with a strong base effect materializing in FY22 - and growth is expected to stabilize at around 6-6.5 percent thereafter.

(Sources: <https://www.worldbank.org/en/country/india/overview>)

Though, the Indian economy had been experiencing significant slowdown over the past few quarters, there was a strong hope of recovery in the last quarter of the current fiscal. However, the new coronavirus epidemic has made the recovery extremely difficult in the near to medium term. The outbreak has presented fresh challenges for the Indian economy now, causing severe disruptive impact on both demand and supply side elements which has the potential to derail India's growth story. Consumption is getting impacted due to job losses and decline in income levels of people particularly the daily wage earners due to slowing activity in several sectors including retail, construction, entertainment, etc. With widespread fear and panic now increasing among people, overall confidence level of consumers has dropped significantly, leading to postponement of their purchasing decisions. Greater uncertainty about the future course and repercussion of Covid-19 has also made the financial market extremely volatile, leading to huge crashes and wealth erosion, which in turn is impacting consumption levels. On the supply side, shutdown of factories and the resulting delay in supply of goods from China has affected many Indian manufacturing sectors which source their intermediate and final product requirements from China. Some sectors like automobiles, pharmaceuticals, electronics, chemical products etc. are facing an imminent raw material and component shortage. This is hampering business sentiment and affecting investment and production schedules of companies. Besides having a negative impact on imports of important raw materials, the slowdown in manufacturing activity in China and other markets of Asia, Europe and the US is impacting India's exports to these countries as well.

Given the challenges that the businesses and people are facing currently, the Indian economy is most likely to experience a lower growth during the last quarter of the current fiscal. In case the spread of corona virus continues, growth may remain subdued in the first quarter of FY 20-21 as well. Most multilateral agencies and credit rating agencies have therefore revised their 2020 and 2021 growth projections for India keeping in view the negative impact of coronavirus-induced travel restrictions, supply chain disruptions, subdued consumption and investment levels on the growth of both global and the Indian economy.

OVERVIEW OF IT INDUSTRY

In 2020, the global information technology industry took a small step back in terms of overall revenue. As of August 2020, the research consultancy IDC was projecting global revenue of \$4.8 trillion for the year, compared to their original estimate of \$5.2 trillion. While the tech sector fared better than many other industries during the pandemic, it was not immune to cutbacks in spending patterns and deferment of major investments.

Moving forward, IDC projects that the technology industry is on pace to reach \$5 trillion in 2021. If this number holds, it would represent 4.2% growth, signaling a return to the trend line that the industry was on prior to the pandemic. Looking even further into the future, IDC expects the pattern to continue, estimating a 5% compound annual growth rate (CAGR) for the industry through 2024.

The United States is the largest tech market in the world, representing 33% of the total, or approximately \$1.6 trillion for 2021. In the U.S., as well as in many other countries, the tech sector accounts for a significant portion of economic activity. CompTIA's Cyberstates report reveals that the economic impact of the U.S. tech sector, measured as a percentage of gross domestic product, exceeds that of most other industries, including notable sectors such as retail, construction and transportation.

Despite the size of the U.S. market, the majority of technology spending (67%) occurs beyond its borders. Spending is often correlated with factors such as population, GDP and market maturity. Among global regions, western Europe remains a significant contributor, accounting for approximately one of every five technology dollars spent worldwide. However, as far as individual countries go, China has clearly established itself as a major player in the global tech market. China has followed a pattern that can also be seen in developing regions, where there is a twofold effect of closing the gap in categories such as IT infrastructure, software and services, along with staking out leadership positions in emerging areas such as 5G and robotics.

The bulk of technology spending stems from purchases made by corporate or government entities. A smaller portion comes from household spending, including home-based businesses. With the blurring of work and personal life, especially in the small business space, it can be difficult to precisely classify certain types of technology purchases as being solely business or solely consumer.

There are a number of taxonomies for depicting the information technology space. Using the conventional approach, the industry market can be categorized into five top level buckets. The traditional categories of hardware, software and services account for 56% of the global total. The other core category, telecom services, accounts for 26%. The remaining 19% covers various emerging technologies that either don't fit into one of the traditional buckets or span multiple categories, which is the case for many emerging as-a-service solutions that include elements of hardware, software and service, such as IoT, drones and many automating technologies.

The allocation of spending will vary from country to country based on a number of factors. In the mature U.S. market, for example, there is robust infrastructure and platforms, a large installed base of users equipped with connected devices, and available bandwidth for these devices to communicate. This paves the way for investments in the software and services that sit on top of this foundation.

Tech services and software account for nearly half of spending in the U.S. technology market, significantly higher than the rate in many other global regions. Countries that are not quite as far along in these areas tend to allocate more spending to traditional hardware and telecom services. Building out infrastructure and developing a broad-based digital workforce does not happen overnight. Scenarios do exist, however, whereby those without legacy infrastructure – and the friction that often comes with transitioning from old to new – may find an easier path to jump directly to the latest generation of technologies.

Although IDC is predicting a return to solid growth, the environment is more uncertain than any in recent memory. Several factors could swing actual spending in either direction. On the upside, technology firms are planning to capitalize on the ongoing digitalization of business, whether that is expanding engagements with their current customer base or reaching into new segments. Additionally, technology firms are applying lessons learned from a challenging year and placing the spotlight on their internal operations, including sales and marketing efforts.

For the most part, negative sentiment is driven by uncertainty. Top of mind are any continued business struggles as the COVID epidemic drags on. Beyond that, the specter of some unexpected event feels more real after the events of last year. Ultimately, customers may postpone purchases or IT projects even further as they deal with uncertainty in their own space. Typical hurdles such as the availability of skills are still in the picture, but for most companies, the plans for 2021 are defined more by the unknown than quantifiable challenges.

The enormity of the industry is a function of many of the trends discussed in this report. Economies, jobs, and personal lives are becoming more digital, more connected and more automated—a trend that is only accelerating after recent events. The platform for computing has become much more stable, with access to technology no longer limited by location or

constrained to certain activities. As a result, more energy is pouring into creative solutions, further expanding the opportunities for both IT professionals and IT channel firms.

Major companies in the information technology (IT) market include AT&T; Apple; Verizon Communications Inc.; China Mobile Ltd and Microsoft.

The global information technology market is expected to grow from \$7850.57 billion in 2020 to \$8370.95 billion in 2021 at a compound annual growth rate (CAGR) of 6.6%. The growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$11866.34 billion in 2025 at a CAGR of 9%.

The information technology (IT) market consists of sales of information technology (IT) services and related goods by entities (organizations, sole traders and partnerships) that apply computers, computer peripherals and telecommunications equipment to store, retrieve, transmit and maneuver data. The IT market involves services such as computer networking, broadcasting, systems design services and information distribution technologies like television and telephones and other equipment used during the process. The IT market also includes sales of goods such as computers, computer peripherals and telecommunications equipment which are used in providing IT services. The IT market is segmented into IT services; computer hardware; telecom and software products.

North America was the largest region in the global information technology market, accounting for 34% of the market in 2020. Asia Pacific was the second largest region accounting for 32% of the global information technology market. Africa was the smallest region in the global information technology market.

Over the past five years there has been an increasing prevalence of low cost open source alternatives. Open source has become a preferred platform for developing new technology. In the past, software publishers would open source software that was not making money, but now companies are open sourcing software to increase its presence and share in the market. According to Allison Randal, President, Open Source Initiative, 78% of companies use open source solutions and 64% participate in open source projects indicating an increase in open source software platforms to build applications in 2015.

The outbreak of Coronavirus disease (COVID-19) has acted as a significant restraint on the information technology market in 2020 as supply chains were disrupted due to trade restrictions and employees working for these establishments faced difficulties related to infrastructure and communication owing to lockdowns imposed by governments globally, forcing them to work from home. COVID 19 is an infectious disease with flu-like symptoms including fever, cough, and difficulty in breathing. The virus was first identified in 2019 in Wuhan, Hubei province of the People's Republic of China and spread globally including Western Europe, North America and Asia. Steps by national governments to contain the transmission have resulted in a decline in economic activity with countries entering a state of 'lock down' and the outbreak is expected to continue to have a negative impact on businesses throughout 2020 and into 2021. However, it is expected that the information technology market will recover from the shock across the forecast period as it is a 'black swan' event and not related to ongoing or fundamental weaknesses in the market or the global economy.

The demand for cloud computing services is expected to drive the demand for IT services during the forecast period. In cloud computing model data is stored on the internet by a cloud computing provider, who manages and operates data storage as a service. Many companies are now choosing applications hosted in the cloud for their day-to-day operations. For example, according to statistics provided by hostingtribunal.com, 60% of computing workloads were running in the public cloud in 2019. Similarly, 94% of enterprise workloads are expected to be processed by cloud data centers in 2021. Companies are also opting for cloud-based data storage; thus, boosting the demand for IT services.

All assets and liabilities have been classified as current and non-current as per normal operating cycle of the Company and other criteria set out in the Schedule III of the Companies Act, 2013.

b) Revenue recognition:

- i) Revenue is recognised to the extent that it is probable that the economic benefits will flow to the company and the revenue can be reliably measured.
- ii) Revenue from maintenance contracts are recognised pro rata over the period of the contract as and when services are rendered.
- iii) All other income and expenditure are recognised and accounted for on accrual basis.

c) Use of estimates:

The preparation of financial statements requires estimates and assumptions to be made that affect the reported amount of assets and liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognised in the period in which the results are known/ materialised.

d) Cash and Cash Equivalents (for purposes of Cash Flow Statement)

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

e) Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit/loss before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

f) Inventories

Inventories are valued at lower of cost and net realizable value, including necessary provision for obsolescence. Cost is determined using the weighted average method.

Work in Progress are valued at cost including related overhead costs.

g) Tangible Fixed Assets:

- i. An item is classified as Tangible fixed asset only if it satisfies the recognition criteria stated in AS 10 (i.e.) is probable that future economic benefits will flow to the company and the cost of such item could be measured. Stores and Spares fulfilling the above conditions are also classified as fixed assets. Fixed assets are initially recognized at its purchase price including all costs directly attributable to bring the asset in a ready to use condition. All subsequent cost incurred such as day to day running expenses, repair and maintenance expenses are treated as revenue expenses except when such expenditure satisfied the recognition criteria stated above. Cost Model is followed after initial recognition i.e. Fixed Assets are carried at cost less accumulated depreciation/amortization/impairment.
- ii. **Depreciation:** Fixed assets are depreciated using the Written Down Value method. Useful lives of assets necessary for calculation of depreciation rates are taken as specified in Schedule II of Companies Act, 2013.
- iii. Fixed assets retired from active use and held for sale are stated at the lower of their net book value and net realizable value and are disclosed separately.
- iv. Capital Work-in-Progress: Projects under which tangible fixed assets are not yet ready for their intended use and other capital work-in-progress are carried at cost, comprising direct cost, related incidental expenses and attributable borrowing costs.

h) Intangible Assets/Intangible Asset under Development:

Intangible Assets are recorded at the consideration paid for acquisition of such assets and are carried at cost less accumulated amortization and impairment.

Software Products Developed/Purchased which are held for use in the production or supply of goods and services, for rental to others or for administrative purposes have been recognized as Intangible Assets.

Research Costs are expensed as incurred. Software product development cost are expensed as incurred unless technical and commercial feasibility of the product is demonstrated, future economic benefits are probable, the company has an intention and ability to complete and use or sell the software and the costs can be measured reliably. The costs which can be capitalized include the cost of materials, directs labour, and overhead cost that are directly or indirectly attributable to preparing the asset for intended use.

Intangible assets are amortized on written down value method over their estimated useful life or 5 years, whichever is lower. The estimated useful life of the intangible assets and the amortization period are reviewed at the end of each financial year and the amortization period is revised to reflect the changed pattern, if any.

Intangible Asset under Development: - All Software Development Expenses eligible for capitalization are recognized as "Intangible Assets under Development" until the Software Product is ready for market.

i) Impairment of assets:

The carrying value of assets/cash generating units at each balance sheet date is reviewed for impairment if any indication of impairment exists. If the carrying amount of the assets exceeds the estimated recoverable amount, impairment is recognized for such excess amount. The impairment loss is recognized as an expense in the Statement of Profit and Loss, unless the asset is carried at revalued amount, in which case any impairment loss of the revalued asset is treated as a revaluation decrease to the extent a revaluation reserve is available for that asset.

The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor.

When there is indication that an impairment loss recognized for an asset (other than a revalued asset) in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognized in the Statement of Profit and Loss, to the extent the amount was previously charged to the Statement of Profit and Loss. In case of revalued assets such reversal is not recognized.

j) Investments:

Investments are classified into current and long-term investments. Current investments are stated at lower of cost and fair value. Long-term investments are stated at cost. A provision for diminution is made to recognise a decline, other than temporary, in the value of long-term investments.

k) Employee benefits:

Wages, salaries, paid annual leave, sick leave and bonuses are accrued in the year in which the services are rendered by the employees. The company does not permit accumulating of unused leaves. The company does not provide any long-term employee benefits except gratuity.

The company is not having any defined contribution plan and nor has made any provision for payment of Gratuity

l) Borrowing cost:

Borrowing cost attributable to the acquisition or construction of qualifying assets are capitalised as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use. All other borrowing costs are charged to revenue.

m) Taxation:

The tax expense for the period comprises current and deferred tax. Tax is recognized in Statement of Profit and Loss, except to the extent that it relates to items recognized in the reserves directly. In such cases, the tax is also recognized in the reserves.

- Current tax

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates and laws that are enacted or substantively enacted at the Balance sheet date.

- Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of Deferred tax liabilities and assets are reviewed at the end of each reporting period.

n) Provisions, contingent liabilities and contingent assets:

A provision is recognized when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present values and are determined based on the best estimate required to settle the obligations at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates. Contingent liabilities are not recognized in the financial statements and are disclosed in the Notes. A Contingent asset is neither recognized nor disclosed in the financial statements.

o) Earnings Per Share

Basic earnings per share is computed by dividing the profit/loss after tax by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit/loss after tax as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless

they have been issued at a later date. The number of equity shares and potentially dilutive equity shares are adjusted for share splits/reverse share splits and bonus shares, as appropriate.

FACTORS AFFECTING OUR RESULT OF OPERATIONS

Except as otherwise stated in the Prospectus and the Risk Factors given in the Prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others:

Inability to compete effectively may lead to lower market share

We cannot assure you that this industry will continue to grow at this rate in the future. The IT industry in India has just begun few years back and is still in its early stages and may experience slower growth in the future due to various market saturations.

Competition

We face competition in our business from other existing service providers. We provide our services and products in competitive markets and there are many players in the market providing same services like ours, if we are not able to compete with them through our marketing tactics, we might lose our market share in future. We compete with our competitors on a regional basis.

Dependency on limited Number of Customer

Our dependence on limited number of customers for a significant portion of our revenues though we have been increasing our client base year on year.

Our ability to optimize our existing offerings and launch new Products that is useful in office automation

We currently offer a diversified suite of offerings, across Office automation, Securing fintech and Digitalization. Our ability to continue to enhance these offerings and cater to SMEs and corporates, will determine their continued usage of these products. Further, while our Products were initially developed for the Indian market, we will scale this to global audiences and benefitted from sales and revenue generation in global markets. In addition, our ability to identify the right target market for each of our offerings will play a key role in determining how these offerings are received and adopted by users.

Our ability to continue to maximize our operating leverage across our businesses

The performance of each of our business segments is integral to our continued success and future profitability. We expect this to be driven especially by our Office Automation Products and our fintech services. Also, our future growth will depend upon our ability to continue to identify such opportunities, while successfully managing to achieve intended objectives such as revenue enhancement, cost optimization, economies of scale and tapping into new markets

Ability to expand product portfolio while minimizing regulatory risk

We have opted for a strategy focused on near-term profitability rather than investing in brand building and consumer acquisition at scale. Consequently, while we believe that we are currently insulated from regulatory risks associated with this business, we may not be able to fully capitalize on the opportunity presented by this business.

COVID-19 Pandemic

The current outbreak of COVID-19 pandemic and the preventative or protective actions that governments around the world have taken to counter the effects of the pandemic have resulted in a period of economic downturn and business disruption in India, as well as in countries where our customers and suppliers are located. The World Health Organization declared the outbreak of COVID-19 as a public health emergency of international concern on January 30, 2020 and a pandemic on March 11, 2020. The Government of India announced a nation-wide lockdown on March 24, 2020 and imposed several restrictions since then. In view of the nationwide lockdown announced by the Government of India to control the spread of COVID-19, our business operations were temporarily disrupted from March 22, 2020 till April 10, 2020. Since then, we have resumed operations through Work from home policy and started office in a phased manner as per the Government of India and state government's directives. The future impact of COVID-19 or any other severe communicable disease on our business and results of operations depends on several factors including those discussed in the chapter “Risk Factors” beginning on Page No. 23. We are continuing to closely monitor the economic conditions and the effect of COVID-19 and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business.

Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

e) Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit/loss before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

f) Inventories

Inventories are valued at lower of cost and net realizable value, including necessary provision for obsolescence. Cost is determined using the weighted average method. Work in Progress are valued at cost including related overhead costs.

g) Tangible Fixed Assets:

- i. An item is classified as Tangible fixed asset only if it satisfies the recognition criteria stated in AS 10 (i.e.) is probable that future economic benefits will flow to the company and the cost of such item could be measured.

Stores and Spares fulfilling the above conditions are also classified as fixed assets. Fixed assets are initially recognized at its purchase price including all costs directly attributable to bring the asset in a ready to use condition. All subsequent cost incurred such as day to day running expenses, repair and maintenance expenses are treated as revenue expenses except when such expenditure satisfied the recognition criteria stated above. Cost Model is followed after initial recognition i.e., Fixed Assets are carried at cost less accumulated depreciation/amortization/impairment.

- ii. **Depreciation:** Fixed assets are depreciated using the Written Down Value method. Useful lives of assets necessary for calculation of depreciation rates are taken as specified in Schedule II of Companies Act, 2013.
- iii. Fixed assets retired from active use and held for sale are stated at the lower of their net book value and net realizable value and are disclosed separately.
- iv. **Capital Work-in-Progress:** Projects under which tangible fixed assets are not yet ready for their intended use and other capital work-in-progress are carried at cost, comprising direct cost, related incidental expenses and attributable borrowing costs.

h) Intangible Assets:

- i. Intangible Assets are recorded at the consideration paid for acquisition of such assets and are carried at cost less accumulated amortization and impairment.
- ii. Software Products Developed/Purchased which are held for use in the production or supply of goods and services, for rental to others or for administrative purposes have been recognized as Intangible Assets.
- iii. Research Costs are expensed as incurred. Software product development cost are expensed as incurred unless technical and commercial feasibility of the product is demonstrated, future economic benefits are probable, the company has an intention and ability to complete and use or sell the software and the costs can be measured reliably. The costs which can be capitalized include the cost of materials, directs labour, and overhead cost that are directly or indirectly attributable to preparing the asset for intended use.
- iv. Intangible assets are amortized on written down value method over their estimated useful life or 5 years, whichever is lower. The estimated useful life of the intangible assets and the amortization period are reviewed at the end of each financial year and the amortization period is revised to reflect the changed pattern, if any.
- v. Intangible Asset under Development: - All Software Development Expenses eligible for capitalization are recognized as “Intangible Assets under Development” until the Software Product is ready for market.

i) Impairment of assets:

The carrying value of assets/cash generating units at each balance sheet date is reviewed for impairment if any indication of impairment exists. If the carrying amount of the assets exceeds the estimated recoverable amount, impairment is recognized for such excess amount. The impairment loss is recognized as an expense in the Statement of Profit and Loss, unless the asset is carried at revalued amount, in which case any impairment loss of the revalued asset is treated as a revaluation decrease to the extent a revaluation reserve is available for that asset.

The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor.

When there is indication that an impairment loss recognized for an asset (other than a revalued asset) in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognized in the Statement of Profit and Loss, to the extent the amount was previously charged to the Statement of Profit and Loss. In case of revalued assets such reversal is not recognized.

j) Investments:

Investments are classified into current and long-term investments. Current investments are stated at lower of cost and fair value. Long-term investments are stated at cost. A provision for diminution is made to recognise a decline, other than temporary, in the value of long-term investments.

k) Employee benefits:

Wages, salaries, paid annual leave, sick leave and bonuses are accrued in the year in which the services are rendered by the employees. The company does not permit accumulating of unused leaves. The company does not provide any long-term employee benefits except gratuity. The company is not having any defined contribution plan and nor has made any provision for payment of Gratuity

l) Borrowing cost:

Borrowing cost attributable to the acquisition or construction of qualifying assets are capitalised as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use. All other borrowing costs are charged to revenue.

m) Taxation:

The tax expense for the period comprises current and deferred tax. Tax is recognized in Statement of Profit and Loss, except to the extent that it relates to items recognized in the reserves directly. In such cases, the tax is also recognized in the reserves.

- Current tax

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates and laws that are enacted or substantively enacted at the Balance sheet date.

- Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of Deferred tax liabilities and assets are reviewed at the end of each reporting period.

n) Provisions, contingent liabilities and contingent assets:

A provision is recognized when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present values and are determined based on the best estimate required to settle the obligations at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates. Contingent liabilities are not recognized in the financial statements and are disclosed in the Notes. A Contingent asset is neither recognized nor disclosed in the financial statements.

o) Earnings Per Share

Basic earnings per share is computed by dividing the profit/loss after tax by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit/loss after tax as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. The number of equity shares and potentially dilutive equity shares are adjusted for share splits/reverse share splits and bonus shares, as appropriate.

SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for Bids by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 and was continued till June 30, 2019. Under this phase, a Retail Individual Applicant would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six Working Days.

Phase II: This phase commenced on completion of Phase I i.e., with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Application Form by Retail Individual Applicant through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase. As per SEBI circular SEBI/SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the UPI Phase II will continue until further notice by SEBI.

Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment (“**FDI**”) through press notes and press releases. The DPIIT, issued the Consolidated FDI Policy Circular of 2020 (“**FDI Policy**”), which, with effect from October 15, 2020, subsumes and supersedes all press notes, press releases, clarifications, circulars issued by the DPIIT, which were in force as on October 15, 2020. The FDI Policy will be valid and remain in force until superseded in totality or in part thereof.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.
